Zahoor Ahmed

Technical Profile

Experienced Full-Stack Developer with 8 years in JavaScript, TypeScript, Java, and AWS. Skilled in optimizing applications for scalability, integrating complex APIs, and automating CI/CD pipelines. Adepted Generative AI tools for coding, documentation to enhance productivity and innovation.

Frontend

- Hands-on experience with JavaScript (ES6+) and TypeScript
- Proficient in React, Angular 16+, Vue (with TypeScript)
- UI Frameworks: Tailwind CSS, Radix UI, Material UI, Semantic UI, React Core UI

Backend

- Strong expertise in Node.js / Express, Next.js, Nest.js
- Java (J2EE, Spring Boot, Hibernate ORM), Junit, Mockito, Maven, IntellJ IDE
- Php, CI, Laravel, Cakephp
- Databases: MySQL, PostgreSQL, MongoDB, CouchDB, GraphQL, ElasticSearch
- ORM & Query Builders: Prisma, TypeORM, Sequelize

DevOps & Architecture

- Microservices Architecture & Distributed Systems, Serverless
- Containerization & Orchestration: Docker, Docker-Compose, Kubernetes, Linux
- CI/CD & Messaging: Git/GitLab, CI/CD Pipelines, RabbitMQ, Bitbucket

Testing & Quality Assurance

- Test-Driven Development (TDD) & Automation
- Hands on experience in Jest, Mocha, Playwright

Cloud & Scalability

- AWS Services: Lambda, S3, CloudFront, API Gateway, CodePipeline, IAM (Users & Roles)
- Focus on scalability, security, and seamless deployments

Generative AI

- ChatGPT, Gemini, Claude AI, Cursor AI, Prompt Engineering

Experience

Software Engineer (Digital Result GmbH)

Sep 2024 – Present Munich, Bavaria-Württemberg, Germany

» Working on Progressive Web Apps (PWA), AWS services, and serverless architectures.

» Leveraging AWS CloudFront, Lambda, API Gateway, CodePipeline and S3 to deliver seamless, efficient and secure applications.

» Working React/ Typescript, Nodejs along with serverless architect on AWS.

» Designing and optimizing data solutions with PostgreSQL Queries.

» End-to-end automation using Playwright for reliable fast test execution across multiple browsers.

Software Engineer (Retromotion GmbH)

Dec 2022 – Aug 2024 Stuttgart, Baden-Württemberg, Germany

Hands-on experience in Microservices architecture based on Shop, Admin Panel, Fulfillment and Product information Applications using Vuejs, Nodejs, Wallaby and Nuxt.js with Typescript and GraphQL.

» Integrated Amazon seller and fetch orders along with watchers / cronjobs.

» Optimised the ordering flow and discount application in the e-commerce auto shop

» Automated address validation and fixes through DHL and Postcode SOAP & REST API.

» Data storage and retrieval efficiently Query for CouchDB and Elastic Search for Dashboard.

» Implemented auto Reporting and auto subscriptions based on cron jobs.

» Improved WebSocket-based admin dashboard (cockpit) & import exports.

» Interacted with TecDoc & suppliers onboard with optimization for products data.

» Enhanced products and order API flow for different channels Ebay, Tyre24.

» Scrum / Agile collaborated environment with cross-functional teams

» UI & UX reusable components for SPA, App State management with Redux.

» AWS ECS, S3 bucket for deployment and Oauth2.0 implementation.

Software Engineer (TPConnects Technologies Dubai UAE)

Oct 2019 - Oct 2022 Dubai, United Arab Emirates

Team player for MERN / MEAN (Angular, React, Nodejs) stack microservices architecture.

» UI (User Interface) and UX reusable components, State management with NgRx integration.
» Secured application with interceptors, sessions and JWT token-based authentication.
» Integrated Stripe, EasyPay payments methods.
» Executed comprehensive DML and DDL Queries on both SQL and NoSQL databases.
» Designed, configured fully automated CI/CD for web application, successfully resulting in a reduction of average deployment time for the entire project.
» Integrated flight booking flow, voucher generations and post order servicing for British airways, Lufthansa, Sabre, Amadeus, Omar Air in Core Java, Spring Boot and Hibernate.
» TDD development and acceptance criteria with Jest and Mocha. AWS ECS deployment.
» Highly involved in SCRUM, Retrospective and sprint planning. Followed Jira as Tool.

Web Developer (Diwan Arabia - Innovative Knowledge Management)

Jan 2018 - Jan 2019 Dubai, United Arab Emirates

» Integrated with Node.js and Express to build web serveries and Restful APIs.
» Worked on Routing, middleware, cookies and sessions in Express, ensured secure http requests.
» GIT was used as code repository, Webpack used as module bundler, JIRA for bug tracking and Jenkins for continuous integration code deployment.
» Implemented Payment Gateways for E-Commerce Websites and Google Maps APIs as required.
» Developed responsive layouts using Bootstrap and reusable components through React.js.
» Redux for state management of the applications.
» Very proficient knowledge of JIRA to track issues and communicate with other teams at various environments.

Web Developer (Jinnah Software House)

Oct 2016 - Dec 2017 Jhelum Cantt, Pakistan

» Worked on Angular 16 and Nodejs, Php, Laravel and CI for fiver clients.
» Developed a cross-platform activity feed client for the different software products.
» Developed websites for hotel order management systems. Developed XML/RSS to Database and
» Databases to XML Services. Payment Gateways (Stripe) integrated on different Web Portals, JSON, Xml, REST and Soap API development.
» Developed android applications with java.
» Implemented JWT authentication/ authorization.
» Analyzed requirements and used systematic approaches to implement and document the task.
» Developed Android Application with core Javafor Tourism.(University Final Project & Internship).

Qualification

Bachelor of Engineering - BSCSE, Software Engineering. (4 Years)

Virtual University of Pakistan

Bachelor in Computer Science - BSC (2 Years)

Virtual University of Pakistan
